
DARSHAN AGRAWAL

FULL STACK ENGINEER

Email: darshanagrawal007@gmail.com | **Phone:** +91 87881 59713

Availability: Open to Remote | Fulltime | IST · overlaps US EST mornings

LinkedIn: [linkedin.com/in/darshan-agrawal-012](https://www.linkedin.com/in/darshan-agrawal-012) | **GitHub:** github.com/darshan12-code

Portfolio: dashanagrawal-portfolio.vercel.app

SUMMARY

Full Stack Engineer with 4+ years of overall product experience with building React frontends, designing database schemas, and shipping production APIs across live systems. Available immediately for async first remote teams.

SKILLS

- **Frontend:** React.js, Angular, TypeScript, JavaScript (ES6+), D3.js, SCSS, CSS, HTML, responsive UI
 - **Backend:** Node.js, Express.js, Python, Flask, FastAPI, REST APIs, GraphQL, microservices architecture, asynchronous processing
 - **Databases:** PostgreSQL, MongoDB, MySQL, SQL query optimization, indexing, aggregation pipelines
 - **Cloud & DevOps:** AWS (EC2, S3, Lambda), Azure Databricks, Azure Data Factory, Docker, GitHub Actions, CI/CD pipelines, deployment & monitoring
 - **Testing & Quality:** Jest, unit testing, code review, integration testing
 - **System Design:** Scalable systems, distributed architecture, API design, database schema design, caching (Redis)
 - **AI & LLM Integration:** LLM integrations (OpenAI compatible APIs), prompt engineering, streaming responses
 - **Tools & Workflow:** Git, GitHub, GitLab, Jira, Agile/Scrum, async remote collaboration
-

EXPERIENCE

Freelance Full Stack Engineer — Remote

February 2026 – Present

- Delivered contract engineering work for professional network referrals and local clients — frontend components, backend logic, and database/data architecture depending on project scope.

Senior Software Engineer, Full Stack

Rhombuz — Remote | Seattle, WA (US based data driven product company)

Promoted from Software Engineer (Frontend) | February 2023 – January 2026

- Reduced average API response time by **30%** by profiling slow queries, adding indexed lookups, and restructuring Flask endpoints across production services.
 - Designed and shipped a **26 plus metric KPI dashboard** used daily by executives; defined PostgreSQL schema, built REST APIs in Flask, and developed a React + D3.js frontend for live telecom data.
 - Collaborated with team lead to design and implement a **multiservice data pipeline architecture** (Azure Data Factory → Databricks → PostgreSQL → Flask APIs → React), enabling reliable ingestion and transformation of third party data.
 - Mentored **4–6 junior engineers** through code reviews and pair programming, enabling independent delivery of production ready features.
-

Software Engineer, Frontend

Rhombuz — Remote | Seattle, WA (US based data driven product company)

December 2021 – January 2023

- Rebuilt the main dashboard in React, reducing page load time by **45%** through lazy loading, component memoization, and eliminating redundant API calls.
 - Shipped **3+ product features** on schedule across an Angular and React codebase, improving release cadence by **30%** through reusable component patterns and shared utility libraries.
 - Built and maintained an **SCSS design system** used across 7+ product views, keeping UI consistent as the product scaled.
-

PROJECTS

AlgoSensei — AI-Powered DSA & Interview Prep Platform

React, Node.js, Express, MongoDB, Groq SDK (Llama 3.3 70B), REST APIs — March 2026

Live Demo: algosensei-ai.vercel.app | **GitHub:** github.com/darshan12-code/algosensei

- Built a fullstack AI interview prep platform covering DSA coaching, mock interviews, quiz generation, and step by step algorithm visualizations shipped end to end in 2 weeks.
- Solved a Groq SDK streaming limitation by architecting separate handlers for conversational and structured JSON responses, enabling realtime AI feedback without blocking the UI.

Portfolio Site with Full CMS & Sandboxed Admin Panel

React, Flask, PostgreSQL — Feb 2026

Live: dashanagrawal-portfolio.vercel.app

- Built a custom CMS where case studies and blog posts publish through an admin panel with zero code changes.
- Engineered a sandboxed demo admin panel with full session isolation anyone can create, edit, and delete content without touching real data.

Automated Data Pipeline & Executive Reporting System

Python, Azure Data Factory, PostgreSQL — 2023–2024

- Designed a production data pipeline processing large telecom datasets from **16+ public record sources**, automating **75%** of previously manual extraction work.
- Reduced PDF processing time by **70%** and built an automated email scheduler delivering realtime executive reports on a daily schedule.

Market Intelligence KPI Analytics Platform

React, Python Flask, PostgreSQL, Azure Data Factory, Azure Databricks — 2024–2025

- Led development of a large scale analytics platform tracking **26+ business KPIs** across multiple regions, enabling faster performance analysis and decision making.
- Owned solution architecture across data pipelines, database design, backend APIs, and React dashboards, delivering automated reporting and notification workflows.
- Partnered with stakeholders on product requirements and technical design while mentoring junior engineers and driving engineering best practices.

EDUCATION

Master of Computer Applications (MCA)

Sardar Patel College, Gondwana University | June 2019 – September 2021 | **CGPA: 8.96/10**

Bachelor of Science, Information Technology

Sardar Patel College, Gondwana University | June 2016 – May 2019 | **71.83%**, First Class

ACHIEVEMENTS

- Received annual performance bonuses at Rhombuz, in addition to promotions.
- **1st Rank Merit** in BSc IT and MCA, Gondwana University.
- **3rd Prize 2018** — Blind Code & Jam Programming, Beyond the Vision Computer Club.
